# *From Preparation to Shipment, Count on Edwards Enterprises*

## **Kit Assembly & Preparation**

Often times, the components of a custom distribution package are produced by many different suppliers and require kit assembly. Edwards Enterprises can assemble all of the components into a kit and then ship those kits to a distribution list.

Edwards Enterprises' kit assembly services include simple kits (where only a few items are placed in a bag or box) or complex kits that include several components to be placed in custom packaging.

## **Packaging**

Edwards Enterprises' automated and specialized packaging services provide a number of solutions for our customers. These include: **shrink wrapping, blister packaging, auto poly bagging, heat sealing, clamshell packaging, weighing and measuring, bundling, repackaging, labeling and header preparation.**

## **Mailing & Shipment**

Bulk mailing and first class mailings occur right at the plant. You can provide us with your mailing list or Edwards Enterprises can print and produce labels in-house. Specific mailing services include: sorting, collation, folding, labeling and inserting.

## **Mobile & Individual Placement**

A growing number of customers have brought on an Edwards Enterprises' employee in order to complete projects at their locations. In these cases, Edwards Enterprises trains, transports and supervises the employee for a customized, off-site work solution.
